Use my notebook, it adjusts for stable work:

Open file: "homework_4.ipynb" and start it.

Start search: "!python train_search.py --data "/home/ma-user/work/coding 4/datasets" --cutout"

Start training: "!python train.py --data "/home/ma-user/work/coding 4/datasets" --auxiliary --cutout"

Test results: "!python test.py --data "/home/ma-user/work/coding 4/datasets" --auxiliary --cutout --arch PCDARTS --model_path "/home/ma-user/work/coding 4/codebase/PC-DARTS-master/eval-EXP-20191224-091605/weights.pt""

To visualize architecture: "!python visualize.py PCDARTS"
